

Investment flow is optimized to be as simple as possible.

We recommend to use Chrome browser (incognito mode) for better performance.

## ICO started (new user)

You can see bonuses\* progress bar in the left part of the screen.

Contribute button will send you to registration form. Log in button may be used by registered users.

\*This is example picture, bonuses may differ

## Registration (after clicking CONTRIBUTE button)

Registration step 1. Personal details.

First Name

Last Name

Email

Country

Password

Confirm password

By creating an account, I agree to Terms of Service of [Propy](#) and [Orderbook](#)

[CREATE AN ACCOUNT](#)

Already have an account? [Login](#)

Fill all inputs with your personal information and click the button “Create an account”

Registration step 2. Email verification.

The screenshot shows a web interface for authorizing a new device. On the left, under the heading "AUTHORIZE NEW DEVICE", there is a message: "You have been directed to the security checkpoint. It looks like you're signing in with a computer or device we haven't seen before." Below this is a warning: "WARNING: Your account will be blocked after five failed attempts." In the center, there is a text input field labeled "Verification code" with a placeholder text "Please enter the verification code that was emailed to you at r@r.com, and do not share it with anyone." On the right, there is a blue button labeled "CHECK CODE" and a link "Did not receive the email? Resend".

Here you need to verify user email. You will get an email with activation code. Put this code to the Verification code input.

Registration step 3. Phone number verification.

The screenshot shows a web interface for verifying a phone number. On the left, under the heading "VERIFY YOUR PHONE NUMBER", there is a "Phone number" section with a dropdown menu showing a flag and "+46", followed by a blue button with a right arrow. Below this is a message: "Please enter your phone to enable recovery. It can save all your money in case your password was lost. Skip". On the right, there is a "SMS Code" section with five input boxes for digits and a blue button labeled "VERIFY CODE".

After you activate your account it is recommended to enable recovery option. To do so enter your phone number and receive the SMS code.

ATTENTION! We encourage investors to add phone number. If password is lost, there is an option to change it using phone number. This is the only way to save all funds in case account can't be accessed. Orderbook can't recover password in case the phone number is not added. To understand better how does the recovery process work, please, follow this link - <https://www.orderbook.io/#/recovery>

After you finish sign up process you will be able to log in to widget.

During registration you created account at [Orderbook.io](https://Orderbook.io) and you can use your login there to withdraw tokens bought using widget after ICO is finished.

## Login (after clicking LOGIN link)

Sign in step 1. Email/Password.

📄

This invoice expires in 23:12:01

Confirm the transaction with approval of QR-code. Wait for some time while the transaction will be done (depending on network load).

Attention! Don't close your browser and don't update the browser's window until the end of transaction. Transaction processing can take some time (a couple of minutes to an hour). At peak loads it can be more.).

After successful transaction ETH/BTC should be shown on your balance and then it will be converted to the tokens. Don't worry if it won't be at the moment, just wait for some time or contact support team.

After you get Congrats message it means that your transaction was successful and you get your tokens.

**CONGRATULATIONS!**

You've just became an owner of XXX SSS tokens.

In XXX days SSS trading will be released and you will be able to sell your tokens or buy more of them at
